

Garden Show and Landscape Customer Photography Comments

The photo is gorgeous! I love how the dark room ended up working so well for photography. I am going to use the image on our web site and as part of an e-mail blast that I send around to our web site readers.

When I went looking for a photographer for the San Francisco Flower & Garden Show, I needed an individual with unique qualifications. In Gregory, not only did I find a wonderful photographer and someone who has an appreciation of horticulture, but also a professional with a willingness to communicate with each Garden Creator about their vision of the garden in order to best capture that image in his work...critical, considering that following the show all that remains are these images.

Gregory's warmth, sincerity, and attention to detail made him a joy to work with particularly when these qualities existed throughout five overnight shoots!

I would like to thank you for the excellent work you have done for the show in the past. Your photographs were often stunning. I think in many cases you have managed to get the best out of some difficult gardens [to photograph], and really enhanced the appearance of [these] gardens.

Gregory Case was hired as the official photographer for the 2004 Northwest Flower & Garden Show. From the onset of his professional relationship with the Show, he was exceptionally conscientious and diligent about being completely prepared for his assignment. He went the extra mile with a pre-show assignment to photograph construction of several gardens in advance of move-in and did a great job.

Gregory interviewed each garden creator at the Show in order to understand fully his or her priorities, and maintained strong communication with show management to ensure that every expectation was met.

The feedback that I've heard from the garden creators who've received their Show photos was all very positive. They were pleased with the product and were especially pleased with the way Gregory worked with them before and during the show. Without exception, all of the garden creators appreciated how he communicated with them.

Gregory was thorough in every aspect of his job and completely dependable from concept development to product delivery. Thank you for doing such a great job.

The first time WEMCO Landscapes worked with Gregory was at the San Francisco Flower & Garden Show 2003. The coordinators for the show told us that they had a professional photography who does all the shoots for the gardens.

I was a little apprehensive about using Gregory simply because I was not familiar with his work. After talking with Gregory on the phone, I told him to go ahead and do the pictures for our garden.

Gregory presented the proofs to me and I was very impressed with his work. I felt he did an outstanding job and I went ahead

and ordered a package. One picture in particular I was able to use on a sign that we enlarged to a 5' x 5' picture. The picture quality was excellent and I had no problems with loss of quality or clarity once enlarged.

Gregory has excellent quality pictures and is very professional. He provided WEMCO Landscapes with an outstanding and prompt service. WEMCO Landscapes will continue to use his services and would be happy to recommend Gregory Case for future projects.

Gregory Case is a skilled photographer. Gregory photographed our garden for the San Francisco Garden and Flower Show and we were very pleased with his work. He is willing to try to capture his client's vision of the garden and is resourceful and creative in what he brings to the photograph. Thanks for the wonderful pictures yet again.

Evans Associates has been a player at the San Francisco Flower & Garden Show eight times. The show retained a professional photographer each year to capture the gardens. Gregory Case was that man in 2003 and without question, the finest to date. Kudos for composition, variety, and quality of light.

The garden owners of the Gamble Garden 2003 Spring Garden Tour were thrilled with the pictures that Gregory took of their gardens throughout the year leading up to and including the days of the tour. These pictures were used in advertising and a CD was presented as a gift to each garden owner after the tour was over. It was a delight to work with Gregory.
